This white room is referenced from the passage system of one of the pyramids of Giza, the Pyramid of Khufu.

The structure has a beautiful and a mysterious history in it as it is part of the Seven Wonders of the Ancient World. The structure is mostly built of mud bricks and before, the interior was filled with gold items together with the King's (Pharaoh's) coffin. In today's time, the place is now a tourist attraction, and the inside of the pyramids are now restored, modernized, and preserved.

Before, the inside was lighted by torches but today, the place is lit by LED lights.

The next slide presents the passage system of the pyramid, which is mainly our basis for this white room.
